Simple Instant Summer Updates Getting Everyone's Attention

Stop living life in monochrome and find a colourful start to summer with this season's lip trends!

Summer is all about effortless cool lips. Get inspired by lust-worthy lips, innovative cosmetic techniques and super-chic cosmetic hacks that will give you an upgraded look instantly.

If you've never experienced (or want to re-experience) the power of your lips, then now is the time to join-in this season's big summer hitter and splash out on lips.

Admit it, have you ever been lip magnetised? Drawn in and left with lip envy wondering if they're real and *'how could I get lips like that?'* Lips that speak volumes and attract attention are a total beauty amplifier. Even if you weren't blessed with the power of a Jolie pout or Scarlett Johansson lip fullness, the good news is that lips like this can be naturally-man-made too!

Need A New Summer Look.

Then here's your cue for a no-fail summer kickstart. We've done all the hard work for you and collated this season's top requests with all the tips and tricks to help for lips that steal the show (and keep people guessing how you were blessed with those lips).

Tip 1

Just Natural, Please

Find out how a “touch of lips” is Sydney’s secret to discreet lip restoration and rediscovering your lips of times past.

Contrary to popular opinion, not all lip requests are for Hollywood glamour of Jenner-popping lips. In fact, our most requested “touch of lip” is the perfect entry-point espousing subtlety and fine filler technique. The natural lip look is always in especially for ladies who want a discreet amount of volume only - a touch up. You might wonder why some people get away with cosmetics and not others. Here’s the deal. You can get away with it. Just stick to lips.

Get the Look: Fine border definition and naturalising lip pillows.

Tip 2

Help! Damage Control

If age, smoking and wrinkles of time have crept into lip lines, start relaxing those tightly pursed lips and let your lips do all the talking again.

Sadly, age naturally declines lips. But so does smoking, drinking and sun exposure; dehydrating and accelerating the natural ageing process of collagen depletion which controls the lips volume. The once rose-budding lips of our youth can often require more patting of moisturisers, glosses and lipstick to charm when smiling.

For most women maxing their 40's or onwards, lip maintenance is about natural restoration of lips; preferring the volumes of kisses of time past rather than popping lips begging for attention. Subtle lip refreshers correct lipstick bleeding and focus on border restoration and rehydrating the lips than popping pouts.

Get the Look: Border restoration and hydration filler technique.

I want Pout

Learn the untold secrets to enhancing cupid's bows, upturning smiley lines and lip flicks for the flirtatious lip request.

On the other hand, requesting the Flirtatious pout is always a party season favourite. This season's trending cosmetic trick is the "lip flick" which promises a devilish pout that gets attention.

Get the Look: precise injectables above the Cupid's bow relaxing orbicularis oris causes a subtle curling of the upper lip naturally exaggerating your pout. Filler to oral commissures to create an upturned smile.
